

# Stephen da Conceicao

Staff Software Engineer | Frontend Architect | Platform Engineer

Export, PA • (412) 320-1338 • [stephen.daconceicao@gmail.com](mailto:stephen.daconceicao@gmail.com) • GitHub: [github.com/sdaconceicao](https://github.com/sdaconceicao)

---

## PROFESSIONAL SUMMARY

Staff Software Engineer specializing in frontend architecture, design systems, accessibility, and developer productivity. Experienced in React, TypeScript, Node.js, CI/CD, monorepo architecture, automated testing, and cloud platforms. Leads cross team engineering initiatives that standardize development practices, improve software quality, and accelerate delivery.

---

## TECHNICAL EXPERTISE

- **Frontend Architecture:** React, Next.js, TypeScript, TanStack Query, Storybook, Microfrontends, Design Systems, Web Accessibility, WCAG, ARIA
  - **Backend & APIs:** Node.js, NestJS, Express, GraphQL, REST APIs, Microservices
  - **Cloud & DevOps:** AWS, S3, EC2, CloudFront, API Gateway, CI/CD, GitHub Actions, Bitbucket Pipelines
  - **Testing & Quality:** Vitest, Jest, Cypress, Playwright
  - **Data & Storage:** PostgreSQL, MySQL
  - **Developer Experience:** Nx, Monorepos, Vite, Webpack, Rollup, Workspaces, Build Systems, Linting
  - **Languages:** TypeScript, JavaScript, Java, PHP, SQL
- 

## PROFESSIONAL EXPERIENCE

### NCS Credit — *Staff Software Engineer*

Nov 2025 – Present

- Established **CI/CD processes** that increased deployment frequency by ~100%, reduced build/test failures by ~35%, and improved deployment confidence with automated validation and release safeguards.
  - Led **team training on effective AI agent workflows**, optimizing prompt strategies and model selection to reduce token consumption costs by ~70% within two months.
  - Implemented **asynchronous backlog refinement** processes to reduce dependency on recurring meetings, decreasing team meeting time by ~75% while maintaining delivery alignment
- 

### RV Life — *Principal Engineer / Tech Lead*

May 2022 – Aug 2025

*Promoted to Principal Engineer in Nov 2022*

- Led adoption of an **Nx monorepo architecture** to unify multiple applications, decreasing duplicate code by **66%**, reducing build/configuration inconsistencies by ~75%, and reducing new package setup time by ~80%.

- Introduced automated testing strategy using Jest and Cypress, increasing test coverage from **12%** to **84%** and shortening regression testing time by **~50%**.
  - Built **automated PR validation pipelines** using GitHub and Jira MCP integration with preview deployment environments, enforcing acceptance criteria and coding standards, reducing manual review overhead by **~20%**, and providing instant access for developers and QA to review features.
  - Integrated **Design System and documentation workflows (React + Storybook)** to create cohesive visual designs across 3 microfrontends and 2 applications, moving component usage from application specific implementations to 100% shared components.
  - Migrated legacy **Laravel** monolithic backend to **NestJS microservice (AWS, EBS, API Gateway)**, cutting monthly costs by **~15%** while providing better scalability and redundancy.
  - Mentored a team of 6 frontend engineers by introducing **linting, testing standards, and TypeScript best practices**, improving code consistency, increasing PR approval speed by **~20%**, and strengthening maintainability across 4 codebases.
- 

## **Aura — Frontend Web Lead**

Jan 2022 – Apr 2022

- Implemented **Storybook-based component system** to standardize UI development, improving component reuse by **~10%** and reducing UI inconsistencies
- 

## **Bottomline Technologies — Senior UI Developer**

Aug 2019 – Dec 2021

- Built and maintained **CI/CD pipelines** using **Jenkins and Bitbucket**, automating testing and deployments, reducing manual release time by **~50%**.
  - Designed and implemented a CI-integrated documentation platform for internal Design System, auto-deploying documentation with component updates and improving developer adoption by **~25%**.
- 

## **Uniguest — Senior Software Engineer**

Jan 2017 – Aug 2019

- Replaced a legacy Flash application with a **modern React solution** to improve load times by **~50%**, and increase compatibility with modern browsers
  - Built **cross platform mobile apps (React + Cordova)** with an automated build and deployment process to expand product reach to iOS and Android users using existing web frontends, removing need for external mobile team and cutting the time for new feature development by **~66%**
- 

## **WeSpeke — Senior Full Stack Developer**

Jul 2015 – Dec 2016

- Developed **AWS-based microservices (SQS, RDS)** to support scalable activity feeds and backend processing
  - Built **real time audio recording and speech recognition modules**, enhancing interactive learning capabilities
  - Migrated legacy Angular architecture to **modern component based ES6 structure**, improving maintainability
  - Introduced **E2E testing (Protractor)** to improve release confidence and reduce regressions
-

## SELECTED PROJECTS

- **Lago — React Design System | 2026**
    - [github.com/sdaconceicao/lago](https://github.com/sdaconceicao/lago)
    - React component library focused on accessibility, reusable primitives, and scalable component architecture.
    - **Technologies:** React, TypeScript, React Aria, Storybook
  - **Bells Across PA | 2026**
    - [github.com/sdaconceicao/pa-libertybells-250](https://github.com/sdaconceicao/pa-libertybells-250)
    - Full Stack mapping application that provides locations of the Bells Across PA event, with functionality to save locations of interest
    - **Technologies:** TanStack Start, React, TypeScript, Leaflet, Neon PostgreSQL
  - **Pokependium | 2025**
    - [github.com/sdaconceicao/pokependium](https://github.com/sdaconceicao/pokependium)
    - Full stack application demonstrating GraphQL API design, SSR for SEO, and data integration.
    - **Technologies:** Next.js, GraphQL, NestJS, TypeScript
  - **Cookbookery | 2022**
    - [github.com/sdaconceicao/cookbookery](https://github.com/sdaconceicao/cookbookery)
    - Full stack web and mobile app for storing and managing recipes
    - **Technologies:** React, React Native, Express
- 

## CERTIFICATIONS

- **Graph Developer – Professional | 2025**
  - **Graph Developer – Associate | 2025**
  - **Apollo API Orchestration – Associate | 2025**
- 

## EDUCATION

- **Duquesne University**
  - **BSBA, Information Systems Management**
  - **BA, Interactive Media**
